

INDEX.

The superior figures tell the exact place on the page, the first figure which column, the second how far down in ninths. 129¹¹ means page 129, first column, one-ninth from top to bottom.

The colon after an initial of a given name, means that it is the most common name, e.g. A: means Augustus; B: Benjamin; C: Charles; D: David; E: Edward; F: Frederick; G: George; H: Henry; I: Isaac; J: John; K: Karl; L: Louis; M: Mark; N: Nicholas; O: Otto; P: Peter; R: Richard; S: Samuel; T: Thomas; W: William.

By omission of many capitals, proper names and capitalized words are made more prominent.

Titles of periodicals in italics, are those quoted or referred to in the Bibliography.

By free use of abbreviations, mostly self explanatory, more references are given in the same space, and as the words are those oftenest used, no difficulty is feared. The apostrophe to mark omission of letters in abbreviations is disregarded as unnecessary.
